Phone number _______________________________________________________________________________________

Email ______________________________________________________________________________________________

Offer must be redeemed within 6 months of the breast augmentation procedure.

Only a doctor can determine if BOTOX® Cosmetic is right for patients.

CoolSculpting® has not been studied with Natrelle® breast implants, nor is it intended to be used in combination with Natrelle® breast implants.

*CoolSculpting® is the treatment doctors use most for nonsurgical fat reduction.

†Terms and conditions apply; for qualified augmentation patients only. Must be first experience with BOTOX® Cosmetic or CoolSculpting® treatment. Patient has the ability to choose any physician of her choice. BOTOX® Cosmetic is available by prescription only. CoolSculpting® treatment is available only if your physician has the CoolAdvantage™ applicator. A CoolSculpting® treatment is one CoolAdvantage™ cycle.

Natrelle® Breast Implants Important Information

Who may get breast implants?

Natrelle® Breast Implants are approved for women for the following:

• Breast augmentation for women at least 22 years old for silicone-filled implants.

• Breast augmentation for women at least 18 years old for saline-filled implants.

Breast augmentation includes primary breast augmentation to increase breast size and revision surgery to correct or improve the result of a primary breast augmentation surgery.

Please see Natrelle® Breast Implants Important Safety Information on next page.

BOTOX® Cosmetic (onabotulinumtoxinA) Important Information

Approved Uses

BOTOX® Cosmetic is a prescription medicine that is injected into muscles and used to temporarily improve the look of moderate to severe forehead lines, crow’s feet lines, and frown lines between the eyebrows in adults.

Please see BOTOX® Cosmetic Important Safety Information including Boxed Warning on next page.
Breast implants are not lifetime devices or necessarily a one-time surgery. If you decide to have breast implants, you should have periodic examinations 3 years after surgery and then every 2 years thereafter in order to detect ruptures.

Tell your doctor if you have any of the following conditions: autoimmune diseases, a weakened immune system, planned radiation therapy to the breast or planned surgery; had surgery on your face; have trouble raising your eyebrows; drooping eyelids; any other abnormal facial change; are pregnant or plan to become pregnant (it is not known if BOTOX® Cosmetic can harm your unborn baby); are breast-feeding or plan to (it is not known if BOTOX® Cosmetic passes into breast milk).

Tell your doctor about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements. Using BOTOX® Cosmetic with certain other medicines may cause serious side effects. Do not start any new medicines until you have told your doctor that you have received BOTOX® Cosmetic in the past.

Tell your doctor if you have received any other botulinum toxin product in the last 4 months; have received injections of botulinum toxin such as Myobloc®, Dysport® or Xeomin® in the past (tell your doctor exactly which product you received); have recently received an antibiotic by injection; take muscle relaxants; take an allergy or cold medicine; take a sleep medicine; take aspirin-like products or blood thinners.

Other side effects of BOTOX® Cosmetic include: dry mouth; discomfort or pain at the injection site; tiredness; headache; neck pain; and eye problems: double vision, blurred vision, decreased eyesight, drooping eyelids and eyebrows, swelling of your eyelids and dry eyes.

For more information refer to the Medication Guide or talk with your doctor.

To report a side effect, please call Allergan at 1-800-678-1605.

Please see BOTOX® Cosmetic full Product Information including Boxed Warning and Medication Guide.

The CoolSculpting procedure is FDA-cleared for the treatment of visible fat bulges in the submental area, thigh, abdomen and flank, along with bra fat, back fat, underneath the buttocks (also known as a banana roll), and upper arm. It is also FDA-cleared to affect the appearance of lax tissue with submental area treatments.

During the procedure you may experience sensations of pulling, tugging, mild pinching, intense cold, tingling, stinging, aching, and cramping at the treatment site. These sensations side as the area becomes numb. Following the procedure, typical side effects include temporary redness, swelling, blanching, bruising, firmness, tingling, stinging, tenderness, cramping, aching, itching, or skin sensitivity, and sensation of fullness in the back of the throat after a submental area treatment.

Rare side effects may also occur. The CoolSculpting procedure is not for everyone. You should not have the CoolSculpting procedure if you suffer from cryoglobulinemia, cold agglutinin disease, or paroxysmal cold hemoglobinuria. The CoolSculpting procedure is not a treatment for obesity. Ask your doctor if CoolSculpting is right for you.

To learn more about what to expect, visit coolsculpting.com.

SkinMedica® is a physician-dispensed, cosmetic, and nonprescription skin care product line.

Sunburn alert: AHA/BHA Exfoliating Cleanser contains an alpha-hydroxy acid (AHA) that may increase the skin’s sensitivity to the sun and particularly the possibility of sunburn. Patients should use a sunscreen, wear protective clothing, and limit sun exposure while using this product and for a week following discontinuation.

Most SkinMedica® products are intended to meet the FDA’s definition of a cosmetic product, an article applied to the human body to cleanse, beautify, promote attractiveness, and alter appearances. These SkinMedica® products are not intended to be drug products that diagnose, treat, cure, or prevent any disease or condition. These SkinMedica® products have not been approved by the FDA, and the statements about SkinMedica® products herein have not been evaluated by the FDA.

SkinMedica® TOTAL DEFENSE + REPAIR Broad Spectrum SPF 34 Sunscreen is an over-the-counter drug product that is formulated and marketed pursuant to FDA’s governing regulations set forth at 21 CFR Part 352.
